HYDRAULIC FLOOR JACK

The **TEKIRO** Hydraulic Floor Jack is heavy duty and designed to meet the demanding lifting needs of the professional service technician. Features include high-quality material, flanged side plates for strength, powder coat paint, and a safety overload valve for added protection. These are some of the strongest and most durable floor jacks in the industry.

Complies with
ASME
Safety Standards

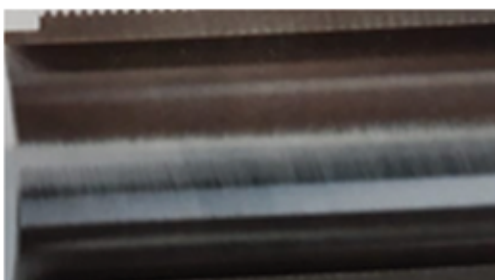

SPECIAL QUALITY DESIGN

Polished and treated cylinder rams use high performance seals.

Polished inner cylinder walls extend the life of the seals to minimize abrasion and wear.

HYDRAULIC FLOOR JACK 2 TON 360°

Carry Handle for easy movement (360 degree)

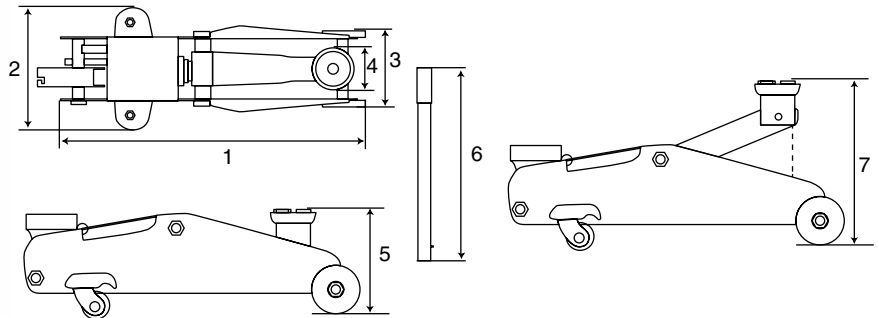

- Safety valve to prevent overload

BOTTLE JACK

TEKIRO Hydraulic Welded Bottle Jack is designed for commercial use in various industries such as automotive, marine, construction, manufacturing and agriculture. The inner and outer welded structure and steel construction keeps it leak-free and give it an overall stronger build.

Complies with
ASME
Safety Standards

Steel lifting saddle engineered to hold load securely

Welded Design to prevent leakage & extends service life

Simple Handle

Hot forged base creates consistency and reduces oil contamination

Lowering Valve

Extension screw adjusts to accommodate desired work height

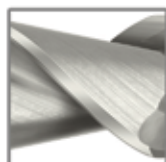

Powder Coating with high adhesion and corrosion resistance

Glide-action pressure pump is designed to lift with minimal effort

Welded Design to prevent leakage & extends service life

Internal Safety Overload Valve

HIGH GRADE STEEL

Constructed of high-grade steel and built to exacting standards for quality & durability.

HIGH QUALITY HYDRAULIC OIL

Hydraulics is powered with high quality oil, which offers better corrosion resistance and high/low-temperature flexibility, allowing the unit to operate at a temperature between 4°C and 40°C.

SAFETY INSTRUCTION

1. Lift the load using a bottle jack

2. After the load is lifted, hold it with a jack stand for safety on work and longer service life of bottle jack

HYDRAULIC WELDED BOTTLE JACK DOUBLE RAM

This is the extension of the Tekiro Welded Bottle Jack range. With double ram, the lifting height could be increased significantly

USERS:

1. Auto repair, general machinery, maintenance industry.

APPLICATION:

1. Applied dis-assembly for bearing, gear shaft, bush and industrial machine parts.
2. Suitable for straightening, rectifying & molding for shaft, machine parts, and industrial metal pieces.

SPECIFICATION

Capacity	: 15 Ton
Cylinder bore	: $\varnothing$ 80mm
Course	: 130mm
Bio-course	: 100mm
Pressure	: 300Kg/cm ²
Cylinder pressure speed	: 2.0mm/R
Reverse pressure speed	: 12mm/sec
Right/left side pitch	: 430mm
CUFT	: 24

ADVANTAGE:

1. Wide range of hydraulic cylinder capacity for more workpieces selection, high quality and durable.
2. Small size frame, operation handle in center-right side location, convenient & safe.
3. Independent hydraulic system is easy to maintain and improves durability.

TEKIRO offers a wide range of Automatic Nitrogen Generators for tyre inflation to cater for different vehicles and needs. Nitrogen as an inflation medium can provide the vehicle or fleet owner with significant cost saving benefits. Studies by industry experts have shown that by reducing the oxygen content in the tyres to a very low level, you could keep your tyres correctly inflated for longer which could increase fuel economy and extend the life of an average tyre about 20%.

THE ADVANTAGE OF INFLATING THE TIRE WITH NITROGEN

- | | | | | | |
|---|-------------------|---|----------------------------------|---|---|
|  | Improves Steering |  | Reduce Tire Oxidation |  | Decreases False Alarms from Tire Pressure Monitoring System |
|  | Improves Handling |  | Eliminate Inside Wheel Corrosion | | |

Max. Wheel Weight	: 65kg

TEKIRO wheel balancer is capable of balancing wheels up to 24" in diameter and weigh up to 65kg. This machine is complete with the 6 balancing mode.

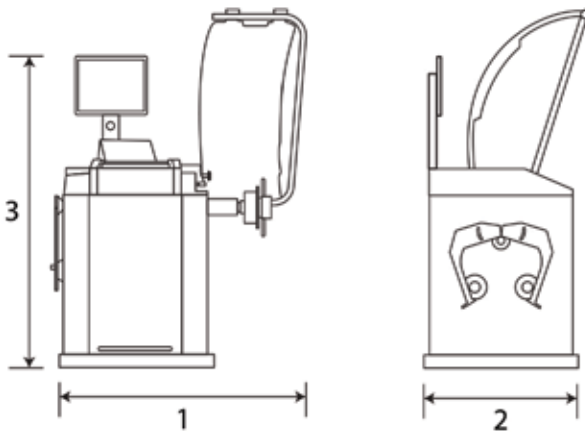

- Latest advanced technology - High precision of self adhesive weight position finding
- High precision main shaft ensures repeated measuring accuracy
- Tracking sticking balancing mode can locate weights precisely and rapidly
- With self-calibration and self-diagnostics functions
- LED light and digital display
- Bigger machine body

TEKIRO Fully automatic wheel balancer uses automatic data entry for all 4 wheel parameters making it very simple to use. The 15" colour LED monitor produces high-quality images and feeds back user information during every step of the balancing procedure. This makes the machine one of the easiest, error free balancing machine on the market.

- Latest advanced technology - High precision of self adhesive weight position finding
- Laser Configuration
- High precision main shaft ensures repeated measuring accuracy
- Automatic distance and wheel diameter measuring
- Tracking sticking balancing mode can locate weights precisely and rapidly
- With self-calibration and self-diagnostics functions
